

Foundry Heatbeater[™]

Foundry Heatbeater[™] is a coated glass fabric glove with a Kevlar[®] felt and glass lining that provides optimum protection from contact heat. The Foundry Heatbeater[™] achieves EN407 Level 4 for contact heat, withstanding temperatures of up to 500°C. It has an aluminised glass fabric cuff offering additional protection to the forearm and helping to radiate heat away from the glove. It has excellent tear resistance enhancing mechanical protection and increasing durability, whilst the felt lining ensures comfort for the wearer. The Foundry Heatbeater[™] is the ideal choice of glove in industries where there is a high risk of injury from heat.

Typically Used For:

- Foundry Work
- Hot Glass Handling
- Ceramics
- Dye Changing
- Heat Treatment Processes

Case Quantity:

1 pair per polybag

Kevlar[®] is a DuPont registered trademark
